

Désertif'actions 2015 / E-forum

E-forum launch "Desertification and Civil Society"

Get involved in the issues of international development!

Désertif'actions 2015 (D'a15) is an international multistakeholders forum on combating desertification and land degradation under a changing climate that takes place in Montpellier from 10 to 13 of June. Ahead of this event, an open web based electronic forum is available on www.desertif-actions.fr/forum, until April 30th.

Feeding the debates before the meeting and working groups in June:

The aim is to establish a collective dialogue among various stakeholders worldwide. Those who cannot be in Montpellier in June are invited to subscribe and contribute online. Therefore, their voice will not be ignored.

The outcomes of the E-forum, will be synthesized and used as a piece of introduction during Désertif'actions 2015. On this forum, you can choose French, English or Spanish.

3 lines of research:

- Desertification and land degradation : how to decide and act according to a changing climate ?
- Sustainability of the drylands : how to increase the synergy among the three main Rio Conventions ?
- A pluralist and well organized civil society : how to play a responsible part in decision making as well in implementing ?

Montpellier Hosts Global Multi-Stakeholder Rendezvous

D'a15 will provide a platform for global civil society to address land degradation issues, so that these may in turn be addressed during 2015's upcoming international gatherings, and in particular during the 21st United Nations Climate Change Conference (COP21), a major diplomatic and political event to be held in Paris in December.

D'a15 will take place in the heart of the City of Montpellier, capital of the Languedoc-Roussillon Region. Montpellier is internationally renowned for its sustainable development and its agronomy scientific communities. Don't miss this unique event! "
